Education

Beihang University (BUAA)

B.E. in Computer Science (Expected Jun 2027)

Program: Top Talents Program in Computer Science

GPA: 3.86 / 4.00 (Rank: 2 / 20)

Research Interests: Generative Models, Diffusion Models, Embodied Robotics, Multimodal Safety, 3D Reconstruction

Advisors: Asst. Prof. Zhaoxin Fan, Prof. Si Liu

Selected Awards

Second Prize (National Level) in the Ministry of Education “Question & Conjecture” Program	2026
Beihang University TA Excellence Award	2025
Beihang University Research Excellence Award	2025
Beihang University Academic Excellence Award	2024
Beihang University Triple-A student	2024
National Scholarship	2024

Selected Academic Projects

Single-Image 3D Human Reconstruction with High-Fidelity Textures

Developed a monocular 3D human reconstruction method that jointly recovers detailed geometry and coherent full-body textures from a single image. Uses part-wise geometry estimation and side-view decoupled transformers.

A Modular Unix-like Shell with Full Parsing and Execution Pipeline

Designed and implemented a Unix-like shell from scratch, featuring lexical analysis, recursive-descent parsing, AST-based execution, etc. The project emphasizes system-level process control, and extensible shell tools inspired by POSIX shells.

MIPS CPU: RTL Implementation of a Pipelined Processor

Designed and implemented a five-stage MIPS pipeline CPU in Verilog with full data forwarding and hazard control, enabling stall-free execution for most data dependencies.
